BLOOM TOWNSHIP DRIVEWAY/CULVERT/RIGHT OF WAY PERMIT APPLICATION

- Property Owners Name: _____
- Address for driveway/culvert _____
- Phone: _____

YOU MUST SUBMIT A SITE PLAN THAT SHOWS WHERE THE DRIVEWAY WILL BE INSTALLED WITH THIS APPLICATION.

RIGHT OF WAY PERMIT

No work shall be done or object placed within the right-of-way of a Township Road without a permit from the Bloom Township Road Superintendent. Large rocks, personalized mailboxes, and other such obstacles become liabilities in accidents resulting in injury or death. Permits are issued on request.

No permission is granted for filling in the township ditch unless a separate permit is approved by the Road Department and the Bloom Township Board of Trustees.

DRIVEWAY DESIGN

Concrete driveways shall be allowed but they must be maintained at equal to or lower than the existing road surface. Concrete driveways shall have a strike joint at the township pavement where it meets the road. Strike joint shall be struck six feet from the edge of the road surface and another one at the edge of the township right-of-way.

Shared driveways are allowed only with a separate Shared Driveway Permit.

Per Bloom Township Zoning resolution #808.8, all driveways must be a minimum of five feet from adjoining property lines.

CULVERT DRIVEWAY PIPE

The culvert pipe shall be a minimum of 16 gauge, galvanized corrugated metal or double walled plastic (if approved) pipe, a minimum of 12 inches in diameter and shall be a minimum of thirty feet in length. Appropriate bands shall be used to join the necessary sections of pipe to prevent displacement. After the existing vegetation is removed from the roadside ditch, the culvert shall be underlaid with two inches of gravel and covered with sufficient gravel so that the completed installation will provide for drainage of water away from the existing Township Road pavement. Drainage into the right-of-way ditch shall be by permit only. Drainage of treated effluent shall be as a last resort only, and a permit application must be accompanied by a letter from the Fairfield County Health Department, stating that no other reasonable option is available.

PLANTINGS

It is recommended that there be no planting other than grass from the centerline of the road back thirty (30) feet.

RURAL MAILBOX

Mailbox supports must be in accordance with the current ODOT Design Manual. Supports for rural mailboxes must be of the "breakaway" type. Standard supports are a 4'x4' timber post, a 4½" round timber post, or a maximum of 2" I.D. metal post of standard wall thickness (2 3/8 O.D.). **The front leading edge of the mailbox must be at least 2' from the traveled edge of the pavement.** At no time shall a mailbox support be encased in concrete. Boxes should be 39" to 42" from the ground to the bottom of the box.

Builder and/or owner have read the above requirements and agree to the specifications.

MEMO

To: **Township Zoning Inspectors**

From: Dennis Oliver, Plumbing Inspector

Re: Plumbing Permits and Inspections Required Update

Date: May 13, 2019

Please inform those in your area that are building new homes or new additions to homes or new buildings with plumbing of this requirement. Please inform those who are remodeling and/or building an addition of this requirement.

Homeowners building in Fairfield County should not become frustrated during the construction of their home because they have not received all the information they needed from the Health Department or any other source for information they depend on.

This is a letter to inform you that the Fairfield Department of Health is requiring plumbing permits and plumbing inspections to be done on new residential plumbing installations and for plumbing remodels on homes built on or after March 1, 2006. Plumbing permits and plumbing inspections are required for new or existing commercial buildings.

At this time, a home built before March 1, 2006 does not require a plumbing permit or plumbing inspections for remodeling that requires changes to their existing plumbing system inside the existing home.

However, if your township has a building department that requires plumbing permits and plumbing inspections, on homes built before March 1, 2006 then the Fairfield Department of Health (FDH) will do the permitting and inspections for these homes.

The FDH has no plumbing permits and inspections required for manufactured HUD homes and trailers.

The FDH does not do plumbing permits and inspections for the following corporation areas that are inside the county: **Canal Winchester, Columbus, Lancaster, Lithopolis, Pickerington and Reynoldsburg.**

If you have any questions please call me at 1-740-652-2819, I am in on Mondays, Wednesdays and Fridays.

The Fairfield County Health Department location and other information are at the bottom of this memo. :

Thank You

NOTICE ABOUT FAIRFIELD DEPARTMENT OF HEALTH PLUMBING PERMITS:

The Fairfield Department of Health requires any new structure to have a plumbing permit if there is plumbing being added to the structure. In a collaborative effort, Bloom Township Zoning Department has agreed to provide this document to the Fairfield Health Department regarding all new construction in our township to obtain the necessary permits, if applicable, from their department. Call (740) 652-2800 to speak with a Department of Health Representative.

FRANK ANDERSON, P.E., P.S.
Fairfield County Engineer

Dear Resident:

The new address that you requested is

The purpose of this letter is to give you a better understanding of the Fairfield County Rural House Numbering System. A numbering system makes the rapid location of your home or business possible.

Your House Number was determined by using an interval from one of two base lines. One thousand numbers have been assigned to each mile, allowing blanks for future numbers. Your road, together with its two letter directional indicator (NE, NW, SE, SW), will show the direction from one of the two base lines. Rural delivery route and box numbers became obsolete in May 1978.

It is recommended that you display your number on both sides of your mailbox. This will help anyone traveling on the road to proceed in the proper direction to their destination. Your complete address is important to you for police, fire, and emergency assistance, utility companies, postal services, and to anyone trying to locate your home or business.

Regulations for a rural mailbox in Fairfield County are based on the Ohio Department of Transportation design standards. All supports for mailboxes shall be of a breakaway type. Standard supports are a 4" X 4" timber post, 4 1/2" round timber post, or a 2" I.D. standard steel pipe (2 3/8" O.D.). The leading edge of the mailbox shall be 2 1/2 foot minimum from the edge of the traveled pavement. Mailbox posts shall not be encased in concrete. A Permit is required to erect a mailbox, install a driveway, or for any work within the right-of-way on a County Road. Permit applications are available through the County Engineer's Office for County roads only. For a permit on a Township Road, contact your Township Trustees or the Ohio Department of Transportation, if you're on a State Highway.

Sincerely,

A handwritten signature in black ink, appearing to read 'Thomas L. Hollett'.

Thomas L. Hollett, Traffic & Permit Inspector
For: K. Todd May, E.I., Subdivision Engineer
